DETAILED ACTION

- This action is responsive to the following communication: an Amendment filed on 5/30/06.
- Claims 1-18 & 27-29 have been canceled.

Allowable Subject Matter

Claims 19-26 are allowable over prior art of record; renumbered as claims 1-8.

The following is an examiner's statement of reasons for allowance: The cited prior arts (US 6538762 and US 5166986) of record teach an apparatus and a method for binarizing the multilevel image and to transmit such binarized image data to the external image recording device, but the prior art of record fails to teach and/or suggest "binarization means for binarizing the multilevel image data by *using a dot connectivity parameter* which is variably controllable to control dot connectivity in a binary image; characteristic-information acquisition means for *acquiring characteristic-information concerning dot reproducibility* from the external image recording device, wherein the characteristic-information differs according to a type of the external image recording device; and determination means for *determining the dot connectivity parameter* to be used by the binarization means in accordance with the characteristic-information acquired by said characteristic-information acquisition means *and in combinations of other features*" as cited in independent claims 19 & 23. The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in independent claims 19 & 23 (which renumbered as claims 1 & 5 respectively).
